From 1929 to 1947, Wittgenstein taught at the University of Cambridge. Despite his position, only one book of his philosophy was published during his life: the 75-page Logisch-Philosophische Abhandlung (Logical-Philosophical Treatise, 1921), which appeared, together with an English translation, in 1922 under the Latin title Tractatus Logico-Philosophicus. His only other published works were an article, "Some Remarks on Logical Form" (1929); a review of The Science of Logic, by P. Coffey; and a children's book, "The Philosophy of Language" (1930). His last work, "Remarks on the Foundations of Language" (1953), was published posthumously. Wittgenstein's philosophy is a form of logical positivism, which holds that the only meaningful statements are those that can be verified by empirical observation. He argued that many philosophical problems arise from misunderstandings of the logic of language. His work has had a profound influence on 20th-century philosophy, particularly in the areas of language, logic, and the philosophy of mind.
