Itanium In the concept phase, engineers said "we could run circles around PowerPC. Early predictions were that IA-64 would expand to the lower-end servers, supplanting Xeon, and eventually penetrate into the personal computers, eventually to supplant reduced instruction set computing (RISC) and complex instruction set computing (CISC) architectures for all general-purpose applications. The Itanium architecture originated at Hewlett-Packard (HP), and was later jointly developed by HP and Intel.
