Video game packaging discarded by their previous owners. Today, most physical game releases are shipped in (CD) jewel cases or (DVD) keep cases, with little differences between them. As occasionally the manuals are part of the game experience, owners of games missing manuals try to find replacements Video game packaging refers to the physical storage of the contents of a PC or console game, both for safekeeping and shop display. In the past, a number of materials and packaging designs were used, mostly paperboard or plastic

The Saturn was initially successful in Japan but... The F23 has one roll pin, two gearsets on each of three parallel shafts – the input shaft, the output shaft, and the intermediate shaft. This three-shaft (also called three-axis) design results in a very short axial length for better packaging. There are three separate shift fork shafts, which hold three shift forks to activate the synchronizer rings for the two gearsets on each of the three gear shafts. The shift forks are activated by a cable system. The clutch release bearing is operated by a concentric slave cylinder that surrounds the input shaft in the clutch housing...

The S-Series was marketed in three generations from the fall of 1990 for the 1991 model year through the end of the 2002 model year. The model changes took place for the 1997 and 2000 model years. Saturn marketed itself as a "different kind of car company" and operated quasi-independently from its parent company,—comprehensively introducing a new car, dealer network, pricing structure, workforce and independently managed manufacturing plant in Spring Hill, Tennessee. The first cars themselves launched five years after the company's inception, and they advanced GM's spaceframe construction—manifesting Saturn's market...

The first generation Opel GT (1968–1973) debuted as a styling exercise in 1965 at the Paris and Frankfurt motor shows. The production vehicle used mechanical components from the contemporary Opel Kadett B and two-door hard top bodywork by French contractor Brissonneau & Lotz. The styling of the GT was often cited as similar to the 1968 Chevrolet Corvette which went on sale in September 1967.

Cassini-Huygens Cassini was the fourth space probe to visit Saturn and the first to enter its orbit, where it stayed from 2004 to 2017. The two craft took their names from the astronomers Giovanni Cassini and Christiaan Huygens. Masursky, and Jupiter (December 2000). The mission ended on September 15, 2017, when Cassini's trajectory took it into Saturn's upper atmosphere and it burned Cassini-Huygens (kə-SEE-nee HOY-gənz), commonly called Cassini, was a space-research mission by NASA, the European Space Agency (ESA), and the Italian Space Agency (ASI) to send a space probe to study the planet Saturn and its system, including its rings and natural satellites. The Flagship-class robotic spacecraft comprised both NASA's Cassini space probe and ESA's Huygens lander, which

Discovered in 1655 by the Dutch astronomer Christiaan... Its automobile platform, the Z-body, developed in-house at Saturn and sharing little with other General Motors platforms, used a spaceframe design. Pioneered on the Pontiac Fiero during the 1980s, the spaceframe used non-load-carrying plastic side panels. These polymer panels were dent-resistant, something that remained Saturn's unique selling proposition until a few years before the brand was discontinued. The actual model codes are AW55-50SN and AW55-51SN. Manufacturers have sometimes chosen own designations such as AF23, AF33 or AF33-5 (GM), RE5F22A (Nissan and Infiniti) or SU1 (Renault). Other manufacturers use the original designation(s) or minor variations of it such as AW55-50 LE (Volvo), AW 55-51 LE (Opel)FA57 (Saab), and U660E/U661E/U661F/U760E/U760F (Toyota).

O'Callaghan, Jonathan (November 21, 2019). "A Map of Saturn's Largest Moon" Titan is the largest moon of Saturn and the second-largest in the Solar System. It is the second-largest moon in the Solar System after Jupiter's Ganymede and is larger than Mercury; yet Titan is only 40% as massive as Mercury, because Mercury is mainly iron and rock while much of Titan is mostly ice, which is less dense. Frequently described as a planet-like moon, Titan is 50% larger in diameter than Earth's Moon and 80% more massive
