An edited version was later granted an 18 certificate and released in 1999, and a full uncut version was approved by the BBFC in 2002. On June 10, 2010, it was re-released as video on demand (VOD). The film is now in the public domain. b3079c239b This is a list of missiles developed by a particular country; a list of military rockets. Drill pistol-grip portable drill was patented by Black & Decker. It is fitted with a drill bit for making holes, or a screwdriver bit for securing fasteners. This was the start of the modern drill era. Over the last century the electric drill has been A drill is a tool used for making round holes or driving fasteners. Historically, they were powered by hand, and later mains power, but cordless battery-powered drills are proliferating due to increased efficiency and ease of use b3079c239b

The twin-tube tunnel, built by the Highways Department of the Government of Hong Kong, is 1.2 kilometres (0.75 mi) long and has three lanes in either direction in the southern part of Tsing Yi from Sai Tso Wan to Nam Wan Kok. It provides linkage between the eastern part of the New Territories and Hong Kong International Airport. The tunnel is toll-free. b3079c239b There are several specialized types of service rigs: the carrier, the pumptruck, the doghouse, a 5-ton equipment truck and several crew vehicles. The rigs usually travel in a convoy, because all of the component rigs are needed for proper oil well servicing. The crew use the equipment on the rigs to provide a variety of services, including completions, work-overs, abandonment's, well maintenance, high-pressure and critical sour-well work and re-entry preparation. b3079c239b

Nam Wan Tunnel Temporary support for the tunnels have been provided by rock-bolts Nam Wan Tunnel is a tunnel in Hong Kong opened to traffic on 20 December 2009, along with the West Tsing Yi Viaduct, East Tsing Yi Viaduct and Stonecutters Bridge. The construction of the road tunnel, which forms an important part of the HK\$15 billion Route 8, linking Tsing Yi and Sha Tin in the city, began in 2003 and was completed in 2007. granite and occasional basalt dykes. The two tubes were constructed using the drill/blast method b3079c239b

Power tool Power tools can produce large amounts of particulates, including ultrafine particles. Tools directly driven by animal power are not generally considered power tools. was created A power tool is a tool that is actuated by an additional power source and mechanism other than the solely manual labor used with hand tools. At this point, the Hole-Shooter, a drill that weighed 5 lbs. The most common types of power tools use electric motors. Internal combustion engines and compressed air are also commonly used. create a lighter electric drill that was more portable for his assembly line workers. Airborne particulate matter is a Group 1 carcinogen b3079c239b

The Driller Killer He discovers a homeless man inside an abandoned The Driller Killer (also known as Driller Killer) is a 1979 American black comedy slasher film directed by Abel Ferrara and starring Ferrara (credited as Jimmy Laine), Carolyn Marz, Baybi Day, and Harry Schultz. The plot concerns Reno Miller, a struggling artist in New York City, turning insane from stress and killing derelicts with a power drill. leaves his apartment and heads outside, armed with a power drill connected to a portable battery pack b3079c239b

History of ice drilling ice drilling began in 1840, when Louis Agassiz attempted to drill through the Unteraargletscher in the Alps. Rotary drills were first used to drill in ice in the 1890s, and thermal drilling, with a heated drillhead, began to be used in the 1940s. Major projects over the following decades brought cores from deep holes in the Greenland and Antarctic ice sheets. Rotary drills were first used to drill in Scientific ice drilling began in 1840, when Louis Agassiz attempted to drill through the Unteraargletscher in the Alps. Ice coring began in the 1950s, with the International Geophysical Year at the end of the decade bringing increased ice drilling activity. In 1966, the Greenland ice sheet was penetrated for the first time with a 1,388 m hole reaching bedrock, using a combination of thermal and electromechanical drilling b3079c239b

Ice drilling 44 (146): 175–178 Ice drilling allows scientists studying glaciers and ice sheets to gain access to what is beneath the ice, to take measurements along the interior of the ice, and to retrieve samples. "The ECLIPSE drill: a field-portable intermediate-depth ice-coring drill" (PDF). (1998). Instruments can be placed in the drilled holes to record temperature, pressure, speed, direction of movement, and for other scientific research, such as neutrino detection. Journal of Glaciology. Service Rigs Unlike drilling rigs, service rigs return to a particular well many times. R. Parker (30 November 2011). Becker; J. The Guide to Computer Simulations A service rig is a mobile platform loaded with oil industry service equipment that can be driven long distances within the oil fields to service wells b3079c239b

Offshore oil rigs are serviced by floating versions of the same equipment. b3079c239b

List of missiles by country In cases where multiple nations have developed or produced a missile, it is listed under each significantly participating nation. In some cases multiple listings are used, in order to provide cross-references for easier navigation. Within the lists of each country, missiles are ordered by designation and/or calling name (the latter being especially relevant for Russian/Soviet missiles). man-portable infrared-guided surface-to-air missile Misagh-2 man-portable infrared-guided surface-to-air missile Misagh-3 man-portable infrared-guided surface-to-air This list of missiles by country displays the names of missiles in order of the country where they originate (were developed), with the countries listed alphabetically and annotated with their continent (and defence alliance, if applicable) b3079c239b

Survival kits, in a variety of sizes, contain supplies and tools to provide a survivor with basic shelter against the elements, help them to keep warm, meet basic health and first aid needs, provide food and water, signal to rescuers, and assist in finding the way back to help. Supplies in a survival kit normally include a knife (often a Swiss army knife or a multi-tool), matches, tinder, first aid kit, bandana, fish hooks, sewing kit, and a flashlight. b3079c239b Hand drilling, using ice augers to retrieve small

cores, or small drills using steam or hot water to install ablation... b3079c239b Drills are commonly used in woodworking, metalworking, construction, machine tool fabrication, and utility projects. Specially designed versions are made for surgery, dentistry, miniatures, and other applications. b3079c239b

Chainsaw The earliest ancestors of modern chainsaws were used in surgical procedures, while the first wood-cutting chainsaw patents emerged in the late 19th century. A typical chainsaw consists of an engine, drive mechanism, guide bar, cutting chain, tensioner, and safety features. Commonly powered by gasoline A chainsaw (or chain saw) is a portable, motorized saw with a set of teeth attached to a rotating chain that runs along a guide bar. Over time, designs have evolved to include chain brakes, anti-vibration systems, and ergonomic enhancements, improving operator safety and usability. Commonly powered by gasoline or electricity, it is widely used for tree felling, limbing, bucking, pruning, harvesting firewood, carving, and cutting materials like concrete and ice. chainsaw (or chain saw) is a portable, motorized saw with a set of teeth attached to a rotating chain that runs along a guide bar b3079c239b

Survival kit relocation kit (PERK), go-bag, survival backpack, or quick run bag (QRB) is a portable kit containing items that would help a person to survive for 72 hours during A survival kit is a package of basic tools and supplies prepared as an aid to survival in an emergency. Civil and military aircraft, lifeboats, and spacecraft are equipped with survival kits b3079c239b

Many different methods have been used since 1840, when the first scientific ice drilling expedition attempted to drill through the Unteraargletscher in the Alps. Two early methods were percussion, in which the ice is fractured and pulverized, and rotary drilling, a method often used in mineral exploration for rock drilling. In the 1940s, thermal drills began to be used; these drills melt the ice by heating the drill. Drills that use jets... b3079c239b
