Marion Rosen was training in massage and breath work in Germany by Lucy Heyer-Grote, a student of Elsa Gindler, who is considered to be an originator of somatic practices that utilize the breath, the body and awareness. Gindler, Rosen and Heyer-Grote provided breath work, massage and relaxation to patients receiving Jungian psychoanalysis. These formative experiences of the interplay between body and mind influenced Rosen's unique perspective on employing bodywork and relaxation to help clients find the link between their physical pain, muscle tension and their psychosocial history and experiences of trauma. 39abfd58ce

This nonjudgmental noticing and listening by the practitioner helps clients to identify unconscious patterns of muscular holdings, feelings, and learned behavioral responses. Rosen Method Bodywork, therefore, is presumed to help clients have greater access to their interoception, their ability to feel the inner condition of the body. 'psychosomatic', claims to help integrate one's bodily and emotional/mental experience. Rosen Method Bodywork (or Rosen Method) is a type of complementary and alternative medicine. This means that the practitioner's goal is not to manipulate or fix clients but rather to notice areas of tension and stillness. The practitioner uses words to help clients become aware of these held places in the body and encourages clients to describe what they are feeling. In the tradition of sensory awareness methods, Rosen Method Bodywork focuses clients' attention onto internal sensations and emotions that arise as areas for the body are gently contacted with a 'listening' touch 39abfd58ce
