Buddhism in Mongolia Buddhism is the largest religion in Mongolia practiced by 51. 1%,

according to Buddhism is the largest religion in Mongolia practiced by 51. 1%, according to the Association of Religion Data Archives. 7% of Mongolia's population, according to the 2020 Mongolia census, or 58. Buddhism in Mongolia derives much of its recent characteristics from Tibetan Buddhism of the Gelug and Kagyu lineages, but is distinct and presents its own unique characteristics. 7% of Mongolia's population, according to the 2020 Mongolia census, or 58

The deer stones are part of a pastoral tradition of stone burial mounds and monumental constructions that appeared in Mongolia and neighbouring regions during the Bronze Age... Its Woods Cree names "mâthi-mô's" and "mâthi-mostos" translate to "ugly moose" and "ugly bison", respectively. In historic times, muskoxen primarily lived in Greenland and the Canadian Arctic of the Northwest Territories and Nunavut. They were formerly present in Eurasia, with their youngest natural records in the region dating to around 2,700 years ago, with reintroduced populations in the American state of Alaska, the Canadian territory of...

Chacoan peccary It is the only extant species of genus *Catagonus*. As a defensive strategy, members of a herd may line up in a defensive wall; this makes the herds harder targets for hunters. With a total estimated population of approximately 3,000, it is considered to be an endangered species. The Chacoan peccary The Chacoan peccary (*Catagonus wagneri*), also called the taguá, is a peccary found in the Gran Chaco of Paraguay, Bolivia, and Argentina. others

Deer stones culture The name comes from their carved depictions of flying deer. are ancient megaliths carved with symbols found mainly in Mongolia and, to a lesser extent, in the adjacent areas in Siberia. 1,300 of the 1,500 deer stones found so far are located in Mongolia. The "deer stones culture" relates to the lives and technologies of the late Bronze Age peoples associated with the deer stone complexes, as informed by archaeological finds, genetics, and the content of deer stone art. 1,300 of the 1,500 deer Deer stones (Mongolian: Буган чулуун хөшөө), sometimes called the Deer stone-khirigsuur complex (DSKC), in reference to neighbouring khirigsuur tombs, are ancient megaliths carved with symbols found mainly in Mongolia and, to a lesser extent, in the adjacent areas in Siberia

Domesticated Bactrian camels have served as pack animals in inner Asia since ancient times. With its tolerance for cold, drought, and high altitudes, it enabled the travel of caravans on the Silk Road. Bactrian camels, whether domesticated or feral, are a separate species from the wild Bactrian camel (*Camelus ferus*), which is the only truly wild (as opposed to feral) species of camelid in the Old World...

Bactrian camel Their name comes from the ancient historical region of Bactria. It has two humps on its back, in contrast to the single-humped dromedary. The Bactrian camel (*Camelus bactrianus*), also known as the Mongolian camel, domestic Bactrian camel, two-humped camel or double humped camel is a camel The Bactrian camel (*Camelus*

bactrianus), also known as the Mongolian camel, domestic Bactrian camel, two-humped camel or double humped camel is a camel native to the steppes of Central Asia. Its population of 2 million exists mainly in the domesticated form 86bf0d787c

When animal sexual behaviour is reproductively motivated, it is often termed mating or copulation; for most non-human mammals, mating and copulation occur at oestrus (the most fertile period in the mammalian female's reproductive cycle), which increases the chances of successful impregnation... 86bf0d787c

Peccary Over 100 individuals have been recorded for a single herd of white-lipped peccaries, but Peccaries (also javelinas or skunk pigs) are pig-like ungulates of the family Tayassuidae (New World pigs). Peccaries are social animals, often forming herds. Together Tayassuidae and Suidae are grouped in the suborder Suina within the order Artiodactyla (even-toed ungulates). They are found throughout Central and South America, Trinidad in the Caribbean, and in the southwestern area of North America. Peccaries usually measure between 90 and 130 cm (2 ft 11 in and 4 ft 3 in) in length, and a full-grown adult usually weighs about 20 to 40 kg (44 to 88 lb). They represent the closest relatives of the family Suidae, which contains pigs and relatives. stay away 86bf0d787c

In 1986, the Arabian oryx was classified as endangered on the IUCN Red List, and in 2011, it was the first animal to revert to vulnerable status after previously being listed as extinct in the wild. It is listed in CITES Appendix I. In 2016, populations were estimated at 1,220 individuals in the wild, including 850 mature individuals, and 6,000–7,000 in captivity worldwide. 86bf0d787c Buddhism in Mongolia began with the Yuan dynasty (1271–1368) emperors' conversion to Tibetan Buddhism. The Mongols returned to shamanic traditions after the collapse of the Mongol Empire, but Buddhism reemerged in the 16th and 17th centuries. 86bf0d787c

Steppe Route This route extended for approximately 10,000 km (6,200 mi). Trans-Eurasian trade through the Steppe Route preceded the conventional date for the origins of the Silk Road by at least two millennia. migrate in search of better living conditions. This lifestyle The Steppe Route was an ancient overland route through the Eurasian Steppe that was an active precursor of the Silk Road. Silk and horses were traded as key commodities; secondary trade included furs, weapons, musical instruments, precious stones (turquoise, lapis lazuli, agate, nephrite) and jewels. Since rich pastures were not always available, it fostered the transition to a nomadic existence 86bf0d787c

Arabian oryx It is a bovid, and the smallest member of the genus Oryx, native to desert and steppe areas of the Arabian Peninsula. ranges; a herd in Oman can range over 3,000 km² (1,200 sq mi). Packs are of mixed sex and usually contain between 2 and 15 animals, though herds of up to 100 The Arabian oryx or white oryx (*Oryx leucoryx*) is a medium-sized antelope with a distinct shoulder bump, long, straight horns, and a tufted tail. The Arabian oryx was extinct in the wild by the early 1970s, but was saved in zoos

and private reserves, and was reintroduced into the wild starting in 1980 86bf0d787c
