Carbon accounting It can also be used to track projects or actions to reduce emissions in sectors such as forestry or renewable energy. It Carbon accounting (or greenhouse gas accounting) is a framework of methods to measure and track how much greenhouse gas (GHG) an organization emits. The accounting methods enable them to do this in a more consistent and transparent manner. Organizations will often set an emissions baseline, create targets for reducing emissions, and track progress towards them. Corporations, cities and other groups use these techniques to help limit climate change.
