for the end-user, system administrators... 25707706f0
Requirements – Statements that identify attributes, capabilities, characteristics, or qualities of a system. This is the foundation for what will be or has been implemented. 25707706f0

Network diagram software
Broadly, there are four types of tools that help create network maps and diagrams:. network and how they are interconnected. They are required artifacts to better manage A number of tools exist to generate computer network diagrams. Network maps and diagrams are a component of network documentation 25707706f0

Django's primary goal is to ease the creation of complex, database-driven websites. The framework emphasizes reusability and "pluggability" of components, less code, low coupling, rapid development, and the principle of don't repeat yourself. Python is

used throughout, even for settings, files, and data models. Django also provides an optional administrative create, read, update and delete interface that is generated dynamically through introspection and configured via...

Documentation Paper or hard-copy documentation has become less common. As a form of knowledge management and knowledge organization, documentation can be provided on paper, online, or on digital or analog media, such as audio tape or CDs. Documentation is often distributed via websites, software products, and other online applications. g.) Documentation is any communicable material that is used to describe, explain or instruct regarding some attributes of an object, system or procedure, such as its parts, assembly, installation, maintenance, and use. Manpages
The following are typical hardware and service

documentation types: Network diagrams Network maps Datasheet for IT systems (server, switch, e. Examples are user guides, white papers, online help, and quick-reference guides

Document g. g. , paper, given the existence of electronic documents. Contemporarily, "document" is not defined by its transmission medium, e. fonts, colors, and images. g. In the past, the word was usually used to denote written proof useful as evidence of a truth or fact. In the Computer Age, "document" usually denotes a primarily textual computer file, including its

structure and format, e.
Documents are also distinguished from "realia", which are three. "Documentation" is distinct because it has more denotations than "document", paper, given the existence of electronic documents. medium, e.
Documents A document is a written, drawn, presented, or memorialized representation of thought, often the manifestation of non-fictional, as well as fictional, content. The word originates from the Latin Documentum, which denotes a "teaching" or "lesson": the verb doceō denotes "to teach". "Documentation" is distinct because it has more denotations than "document"

Business case
Language documentation seeks to create as thorough a record as possible of the speech community for both posterity and language revitalization. This record can be public or private depending on

the needs of the community and the purpose of the documentation. In practice, language documentation can range from solo linguistic anthropological fieldwork to the creation of vast online archives that contain dozens of different languages, such as FirstVoices or OLAC.

The project initiation document provides a reference point throughout the project for both the customer and the project team.

The project initiation documentation bundles the information, which was acquired through the starting up a project (SU) and initiating a project (IP) processes in a PRINCE2 controlled project environment. PRINCE2's 2009 renaming "document" to "documentation" indicates a collection of documentation that has been collected up creating a project rather than all the information in the system.

European Documentation Centre

There are 400 such centers in all member states of the EU. The mandate of an EDC is to receive all official EU publications, documents, contracts and electronic databases then make them available to researchers, educators, students, and interested members of the general public. Publications and Documentation: europa. eu retrieved 28-May-2012 EU Information Centres and Networks Searchable map of Documentation Centres CORDIS Curia A European Documentation Centre (EDC) is a body designated by the European Commission to collect and disseminate publications of the European Union for the purposes of research and education. The centers are also legal depositories of Acquis communautaire (EU law). Although primarily academic in nature, anyone can visit an EDC to consult official EU publications
