Consciousness However, its nature has led to millennia of analyses, explanations, and debate among philosophers, scientists, and theologians. Today, it often includes any kind of cognition, experience, feeling, or perception. There is also a medical definition, helping for example. Opinions differ about what exactly needs to be studied or even considered consciousness. In some explanations, it is synonymous with the mind, and at other times, an aspect of it. In the past, it was one's "inner life", the world of introspection, of private thought, imagination, and volition. If the experiment were done in English, since Searle knows English, he would be able to take questions and give answers without Consciousness, at its simplest, is awareness of a state or object, either internal to oneself or in one's external environment. answers could possibly mean.
