Building performance simulation The objective of building performance simulation is the quantification of aspects of building performance which are relevant to the design, construction, operation and control of buildings. Building performance simulation has various sub-domains; most prominent are thermal simulation, lighting simulation, acoustical simulation and air flow simulation. (1993-01-01). A. "Development and integration of an equation-solving program for engineering thermodynamics courses";. Building performance simulation itself is a field within the wider realm of scientific computing. Computer Building performance simulation (BPS) is the replication of aspects of building performance using a computer-based, mathematical model created on the basis of fundamental physical principles and sound engineering practice. Most building performance simulation is based on the use of bespoke simulation software. pdf Klein, S b79fb4135d

It can be generated using WPCleaner by any user. It's possible to update this page by following the procedure below: b79fb4135d Negative resistance is an uncommon property which occurs in a few nonlinear electronic components. In a nonlinear device, two types of resistance can be defined: 'static' or 'absolute resistance', the ratio of voltage to current b79fb4135d

Human impact on the environment Some of the problems, including global warming and biodiversity. consequences. Modifying the environment to fit the needs of society (as in the built environment) is causing severe effects including global warming, environmental degradation (such as ocean acidification), mass extinction

and biodiversity loss, ecological crisis, and ecological collapse. Some human activities that cause damage (either directly or indirectly) to the environment on a global scale include population growth, neoliberal economic policies and rapid economic growth, overconsumption, overexploitation, pollution, and deforestation. Second, the conservation of mass principle and the first law of thermodynamics (i. e. , conservation of energy) dictate that whenever material resources Human impact on the environment (or anthropogenic environmental impact) refers to changes to biophysical environments and to ecosystems, biodiversity, and natural resources caused directly or indirectly by humans b79fb4135d

Negative resistance 206. resistance“ refers to negative static resistance. Klein, Sanford; Gregory Nellis (2011). p. Cambridge University Press. ISBN 978-1139498180 In electronics, negative resistance (NR) is a property of some electrical circuits and devices in which an increase in voltage across the device's terminals results in a decrease in electric current through it. The list contains 50,053 articles. --Cewbot (talk) 08:21, 27 August 2025 (UTC) b79fb4135d This is in contrast to an ordinary resistor, in which an increase in applied voltage causes a proportional increase in current in accordance with Ohm's law, resulting in a positive resistance. Under certain conditions, negative resistance can increase the power of an electrical signal, amplifying it. b79fb4135d
