Digital agriculture includes (but is not limited to) precision agriculture. Unlike precision agriculture, digital agriculture impacts the entire agri-food value chain — before, during, and after on-farm production. Therefore, on-farm technologies like yield... 0ab213726e

2016 in paleontology PMID 27383414. "Cambrian suspension-feeding tubicolous hemichordates";. 1186/s12915-016-0271-4. 14 56. Murdock; Sarah Paleontology or palaeontology is the study of prehistoric life forms on Earth through the examination of plant and animal fossils. BMC Biology. Because humans have encountered fossils for millennia, paleontology has a long history both before and after becoming formalized as a science. Duncan J. This includes the study of body fossils, tracks (ichnites), burrows, cast-off parts, fossilised feces (coprolites), palynomorphs and chemical residues. E. PMC 4936055. This article records significant discoveries and events related to paleontology that occurred or were published in the year 2016. doi:10 0ab213726e

The giant eland is a herbivore, eating grasses, foliage and branches. They usually form small herds consisting of 15–25 members, both males and females. Giant elands are not territorial, and have large home ranges. They are naturally alert and wary, which makes them difficult to approach and observe. They can run at up to 70 km/h (43 mph) and use this speed as a defence against predators. Mating... 0ab213726e

Homo 2307/2411603. 7–11 million years. contributions to the nomenclature and methods of systematic biology";. Systematic Zoology. (1758) Homo (from Latin homō 'human') is a genus of great ape (family Hominidae) that emerged from the genus Australopithecus and encompasses a single extant species, Homo sapiens (modern humans), along with a number of extinct species (collectively called archaic humans) classified as either ancestral or closely related to modern humans; these include Homo erectus and Homo neanderthalensis. The oldest member of the genus is Homo habilis, with records of just over 2 million years ago. 8 (1): 4–22. Homo, together with the genus Paranthropus, is probably most closely related to the species Australopithecus africanus within Australopithecus. von Linné, C. JSTOR 2411603. The closest living relatives of Homo are of the genus Pan (chimpanzees and bonobos), with the ancestors of Pan and Homo estimated to have diverged around 5. doi:10 0ab213726e

Charles Angoff Imagination: Albert Einstein: Papers and Discussions, by Jeremy Bernstein and Gerald Feinberg (1978) Biology and the Future of Man: Papers, by Nathan Hershey, Merrill Charles Angoff (April 22, 1902 – May 3, 1979) was a managing editor of the American Mercury magazine as well as a professor of English of Fairleigh Dickinson University. " He was also a prolific writer and editor. L. H. Mencken called him "the best managing editor in America 0ab213726e

Digital agriculture 1787/91c40e07-en. Sectors";. 122. doi:10. OECD Food, Agriculture, and Fisheries Papers, No. OECD Food, Agriculture and Fisheries Papers. "Innovations Digital agriculture, sometimes known as smart farming or e-agriculture, are tools that digitally collect, store, analyze, and share electronic data and/or information in agriculture. The Food and Agriculture Organization of the United Nations has described the digitalization process of agriculture as the digital agricultural revolution. Lonie (2010). Other definitions, such as those from the United Nations Project Breakthrough, Cornell University, and Purdue University, also emphasize the role of digital technology in the optimization of food systems 0ab213726e

Captorhinidae doi:10. They had a cosmopolitan distribution across Pangea. Bayesian approaches in the investigation of a basal fossil clade. (1914). S. M. 1080/10635150600755396 Watson, D. "Eunotosaurus Captorhinidae is an extinct family of tetrapods, traditionally considered primitive reptiles, known from the late Carboniferous to the Late Permian. " Systematic Biology, 55(3):503-511 0ab213726e

Abrahamskraal Formation 34 (4): 980–986. doi:10. 1080/02724634 The Abrahamskraal Formation is a geological formation and is found in numerous localities in the Northern Cape, Western Cape, and the Eastern Cape of South Africa. It represents the first fully terrestrial geological deposits of the Karoo Basin. 34. Formation (Lower Karoo, Mid-Zambezi Basin) of southern Zambia";. It is the lowermost formation of the Adelaide Subgroup of the Beaufort Group, a major geological group that forms part of the greater Karoo Supergroup. Outcrops of the Abrahamskraal Formation are found from the small town Middelpos in its westernmost localities, then around Sutherland, the Moordenaarskaro north of Laingsburg, Williston, Fraserburg, Leeu-Gamka, Loxton, and Victoria West in the Western Cape and Northern Cape. Bibcode:2014JVPal. Journal of Vertebrate Paleontology. 980S. In the Eastern Cape outcrops are known from Rietbron, north of Klipplaat and Grahamstown, and also southwest of East London 0ab213726e

Royal Society of New Zealand nz. e. Paperspast. , Marsden grants and research fellowships) are provided on behalf of the New Zealand Ministry of Business, Innovation and Employment. " ". natlib.
