The Ruckers family contributed immeasurably to the harpsichord's technical development, pioneering the addition of a second manual; the quality of their instruments is such that the name of Ruckers is as important to early keyboard instruments as that of Stradivarius is to the violin family. In the 18th century, Ruckers instruments were often modified by French makers in a process known as ravalement, to allow for an extended range and other additions. fd4c52ee45

Harpsichord Like a pipe organ, a harpsichord may have more than one keyboard manual and even a pedal board. Harpsichords may also have stop levers which add A harpsichord is a musical instrument played by means of a keyboard. Depressing a key raises its back end within the instrument, which in turn raises a mechanism with a small plectrum made from quill or plastic that plucks one or more strings. The strings are under tension on a soundboard, which is mounted in a wooden case; the soundboard amplifies the vibrations from the strings so that the listeners can hear it. Harpsichords may also have stop levers which add or remove additional octaves. Like a pipe organ, a harpsichord may have more than one keyboard manual and even a pedal board. Some harpsichords may have a buff stop, which brings a strip of buff leather or other material in contact with the strings, muting their sound to simulate the sound of a plucked lute fd4c52ee45
