Ferguson TE20 The TE20 popularised Harry Ferguson's invention of the hydraulic three-point hitch system around the world, and the system quickly became an international standard for tractors of all makes and sizes that has remained to this day. In many parts of the world the TE20 was the first tractor to be affordable to the average farmer and was small and light enough to replace the draft horse and manual labour. It marked a major advance in tractor design, distinguished by light weight, small size, manoeuvrability and versatility. By far his most successful design, it was manufactured from 1946 until 1956, and was commonly known as the Little Grey Fergie.
