(2007-05-20) Rubicon Foundation, Inc. is a

non-profit organization devoted to

contributing to the interdependent

dynamic between research, exploration,

science and education. The foundation,

started in 2002, is located in Durham,

North Carolina and is primarily supported

by donations and grants. Gibson, Dunn &

Crutcher has provided pro bono services to

assist in copyright searches and support.

Funding has included the Office of Naval

Research from 2008 to 2010. Archived

The brand began with the first PlayStation

home console released in Japan in 1994

and worldwide the following year, which

became the first console of any type to ship

over 100 million units, which made

PlayStation a globally recognized brand.

Since then there have been numerous

newer consoles—the most recent being the

PlayStation 5 released in 2020—while

there have also been a series of handheld consoles and a number of other electronics such as a media center and a smartphone...

The cause of motion sickness is either real or perceived motion. This may include car travel, air travel, sea travel, space travel, or reality simulation. Risk factors include pregnancy, migraines, and Ménière's disease. The diagnosis is based on symptoms. 8ac35ca6a4 It had its inaugural release in 2003 as freeware for Windows. Dolphin was the first GameCube emulator that could successfully run commercial games. After troubled development in the first years, Dolphin became free and open-source software and subsequently gained

support for Wii emulation. Soon after, the emulator was ported to Linux and macOS. As mobile hardware became more powerful over the years, running Dolphin on Android became a viable option.

Motion sickness synchronize VR environments with vessel dynamics have demonstrated significant promise in field trials. Symptoms commonly include nausea, vomiting, cold sweat, headache, dizziness, tiredness, loss of appetite, and increased salivation. Complications may rarely include dehydration, electrolyte problems, or a lower esophageal tear. It may also be noted that commercial VR products Motion sickness occurs due to a difference between actual and expected motion

Treatments may include medication, not walking on the affected leg, stretching...

Risk factors include bone fractures, joint dislocations, alcoholism, and the use of high-dose steroids. The condition may also occur without any clear reason. The most commonly affected bone is the femur (thigh bone). Other relatively common sites include the upper arm bone, knee, shoulder, and ankle. Diagnosis is typically by medical imaging such as X-ray, CT scan, or MRI. Rarely biopsy may be used. 8ac35ca6a4 Most dive computers use real-time ambient pressure input to a decompression algorithm to indicate the remaining time to the no-stop limit, and after... 8ac35ca6a4

Destination: Deep Space It involves two alliances of three teams each, with each team controlling a robot and performing specific tasks on a field to score points. The game centers around an outer space theme involving two alliances consisting of three teams each competing to place polycarbonate hatch panels and orange rubber balls or "cargo" on rockets and cargo ships

before returning to their HAB platform to climb at the end of the match. Retrieved 2018-11-18. 2018-11-16. firstfrc.

Dive computer A secondary function is to record the dive profile, warn the diver when certain events occur, and provide useful information about the environment. VR Technology (VR3) Zeagle Along with delayed surface marker buoys, dive computers A dive computer, personal decompression computer or decompression meter is a device used by an underwater diver to measure the elapsed time and depth during a dive and use this data to calculate and display an ascent profile which, according to the programmed decompression algorithm, will give a low risk of decompression sickness. Uwattec - Manufacturer of dive

computers - Acquired by Scubapro, discontinued. Dive computers are a development from decompression tables, the diver's watch and depth gauge, with greater accuracy and the ability to monitor dive profile data in real time

As of 2021, the Rubicon Research Repository is no longer available online. Georges Beuchat was an underwater pioneer who co-founded the French Underwater Federation in 1948. During its 75-year history, the company has deployed several different brand names, among them: "Pêche Sport", "Tarzan", "Beuchat", "Beuchat Sub" and "Beuchat International".

United States Marine Corps Force Reconnaissance Although FORECON companies are conventional forces they share many of the same tactics, techniques, procedures and equipment of special operations forces. the S3 Section using a complex virtual reality-based (VR) computer system. During large-scale operations, Force Reconnaissance companies report to the Marine Expeditionary Force (MEF) and provide direct action and deep reconnaissance.

Though commonly misunderstood to refer to reconnaissance-in-force, the name "Force Recon" refers to the unit's relationship with the Marine Expeditionary Force or Marine Air. While wearing a VR headset device, the Marines hang suspended from the Paraloft Force Reconnaissance (FORECON) are United States Marine Corps reconnaissance units that provide amphibious reconnaissance, deep ground reconnaissance, surveillance, battle-space shaping and limited scale raids in support of a Marine Expeditionary Force (MEF), other Marine air-ground task forces or a joint force

Diving rebreather measurement. This differs from open-circuit breathing apparatus, where the exhaled gas is discharged directly into the environment. Oxygen is added to replenish the amount metabolised by the diver. In 2009 VR Technologies released a commercial CO2 sensor using hydrophobic membranes A diving rebreather is an underwater breathing apparatus that absorbs the carbon dioxide of a diver's exhaled breath to permit the rebreathing (recycling) of the substantially unused oxygen content, and unused inert content when present, of each

breath. High pressures also caused problems for depth compensation. The purpose is to extend the breathing endurance of a limited gas supply, and, for covert military use by frogmen or observation of underwater life, to eliminate the bubbles produced by an open circuit system 8ac35ca6a4
