Wikipedia:Reference desk/Archives/Science/April 2006 might be dialysis. Simply put the solution inside some moistened dialysis tubing and place the whole thing into a low salt buffer, which you can replenish d328d581a9

Blowout preventer hole) pressure and the flow of oil and gas, blowout preventers are intended to prevent tubing (e. drill pipe and well casing), tools, and drilling fluid A blowout preventer (BOP) (pronounced B-O-P) is a specialized valve or similar mechanical device, used to seal, control and monitor oil and gas wells to prevent blowouts, the uncontrolled release of crude oil or natural gas from a well. g. They are usually installed in stacks of other valves d328d581a9

Birmingham, English, 1821-1850 d328d581a9 The earliest blowout preventers; Regan Type K Annulars were used, beginning in the 1930s to cope with extreme erratic pressures and uncontrolled flow (formation kick) emanating from a well reservoir during drilling. Kicks can lead to a potentially catastrophic event known as a blowout. In addition to controlling the downhole (occurring in the drilled hole) pressure and the flow of oil and gas, blowout preventers are intended to prevent tubing (e.g. drill pipe and well casing), tools, and drilling fluid... d328d581a9 File:Wire mesh needle-case with needles, book form, embroidered with floral design, in silk, part of Chalmers collection, English, 1840-1900 d328d581a9 File:Turn pin spectacles, silver, hallmarked London 1830, by M.H., English, 1828-1830 d328d581a9
