Established in 1859 and with over 159,000 current members, ADA is the world's largest and oldest national dental association. The organization lobbies on behalf of the American dental profession and provides dental accreditation The American Dental Association (ADA) is an American professional dental association

Dental hygienists have a specific scope of clinical procedures they provide to their patients. They assess a patient's condition in order...

Dental material Dental products are specially fabricated materials, designed for use in dentistry. There are many different types of dental products, and their characteristics vary according to their intended purpose. There are many different types of dental products, and their characteristics Dental products are specially fabricated materials, designed for use in dentistry

Dental composite doi:10. Synthetic resins evolved as restorative materials since they were insoluble, of good tooth-like appearance, insensitive to dehydration, easy to manipulate and inexpensive. Composite resins are most commonly composed of Bis-GMA and other dimethacrylate monomers (TEGMA, UDMA, HDDMA), a filler material such as silica and in most applications, a photoinitiator. Ullmann's Encyclopedia of Industrial Chemistry. "Dental Materials". Dimethylglyoxime is also commonly added to achieve certain physical properties such as flow-ability. 1002/14356007 Dental composite resins (better referred to as "resin-based composites" or simply "filled resins") are dental cements made of synthetic resins. Weinheim: Wiley-VCH. Martin Lehmann, Matthias Borchert (2006). Further tailoring of physical properties is achieved by formulating unique concentrations of each constituent

It is affiliated to the Rajiv Gandhi University of Health Sciences, Bangalore and recognized by the Dental Council of India, the Government of Karnataka and the Union Ministry of Health and Family Welfare.
