1c597faa3d It is concerned with managing an entire production system that converts inputs (in the forms of raw materials, labor, consumables, and energy) into outputs (in the form of goods and services for consumers). Operations management covers sectors like banking systems, hospitals, companies, working with suppliers, customers, and using technology. Operations is one of the major functions in an organization along with supply chains, marketing, finance and human resources. The operations function requires management of both the strategic and day-to-day production of goods and services.

Operations management for services ISBN 978-0-07-802407-8. It differs from operations management in general, since the processes of service organizations differ from those of manufacturing organizations. (2014). These decisions concern the process, people, information and the system that produces and delivers the service. Service Management: Operations, Strategy, Information Technology, 8th ed. New York: McGraw-Hill/Irwin. It specifically deals with decisions required by operations managers for simultaneous production and consumption of an intangible product. Heizer, Jay; Render Operations management for services has the functional responsibility for producing the services of an organization and providing them directly to its customers
