Artificial intelligence in India In The artificial intelligence (AI) market in India is
projected to reach \$8 billion by 2025, growing at 40% CAGR from 2020 to 2025.
G. ai, Niki. ai and then gaining prominence in the early 2020s based on
reinforcement learning, marked by breakthroughs such as generative AI models

from OpenAI, Krutrim and Alphafold by Google DeepMind. In India, the development of AI has been similarly transformative, with applications in healthcare, finance, and education, bolstered by government initiatives like NITI Aayog's 2018 National Strategy for Artificial Intelligence. Institutions such as the Indian Statistical Institute. Menon founded the National Centre for Software Development and Computing Techniques. This growth is part of the broader AI boom, a global period of rapid technological advancements with India being pioneer starting in the early 2010s with NLP based Chatbots from Haptik, Corover. Distributed operating system Operating Systems: Concepts and Design. Second is a higher-level collection of system management components that coordinate the node's individual and collaborative activities. They handle jobs which are serviced by multiple CPUs. IEEE Press. These components abstract microkernel functions and support user applications. Each subset is a composite of two distinct service provisioners. The first is a ubiquitous minimal kernel, or microkernel, that directly controls that node's hardware.

Distributed Operating Systems and Algorithms A distributed operating system is system software over a collection of independent software, networked, communicating, and physically separate computational nodes. Each individual node holds a specific software subset of the global aggregate operating system. Chow, Randy; Theodore Johnson (1997) e5c7c54bf3
