However, the station was the result of a long and contentious legal battle between Sunbeam and three other applicants for the channel 7 allocation in Miami. Biscayne Television Corporation, a three-way partnership including the publishers of the Miami News and Miami Herald signed on a previous WCKT on July 29, 1956, only to be stripped of its license due to ethics violations... 869032194d 121 869032194d

Entropy Oxford University Entropy is a scientific concept, most commonly associated with states of disorder, randomness, or uncertainty. The term and the concept are used in diverse fields, from classical thermodynamics, where it was first recognized, to the microscopic description of nature in statistical physics, and to the principles of information theory. It has found far-ranging applications in chemistry and physics, in biological systems and their relation to life, in cosmology, economics, and information systems including the transmission of information in telecommunication. 107 869032194d 152 869032194d A good article (GA) is a Wikipedia article that meets a core set of editorial standards, the good article criteria, passing through the good article nomination process successfully. They are well-written, contain factually accurate and verifiable information, are broad in coverage, neutral in point of view, stable, and illustrated, where possible, by relevant images with suitable copyright licenses. Good articles do not have to be as comprehensive as featured articles (FA), but they should not omit any major facets: a comparison of the criteria for good and featured articles describes further differences. 869032194d 69 869032194d 58 869032194d 97 869032194d 103 869032194d 43 869032194d 44 869032194d Entropy is central to the second law of thermodynamics, which states that the entropy of an isolated system left to spontaneous evolution cannot decrease with time.
