Undoing (psychology) Transliterated, it means "making un-happened", which is essentially the core of "undoing". 167 Leslie Sohn, in H Undoing is a defense mechanism in which a person tries to cancel out or remove an unhealthy, destructive or otherwise threatening thought or action by engaging in contrary behavior. 61 Meira Likierman, Melanie Klein: Her Work in Context (2002) p. For example, after thinking about being violent with someone, one would then be overly nice or accommodating to them. It is one of several defense mechanisms proposed by the founder of psychoanalysis Sigmund Freud during his career, many of which were later developed further by his daughter Anna Freud. The German term "Ungeschehenmachen" was first used to describe this defense mechanism. Undoing refers to the phenomenon whereby a person tries to alter the past in some way to avoid or feign disappearance of an adversity or. Melanie Klein She was the primary figure in the development of object relations theory. Klein's work primarily focused on the role of

ambivalence and moral ambiguity in human development. In her theory, how the child resolves that split depends on the constitution of the child and the character of nurturing the child experiences. Klein suggested that pre-verbal existential anxiety in infancy catalyzed the formation of the unconscious, which resulted in the unconscious splitting of the world into good and bad idealizations.
