

Business Analysis And Valuation Palepu

Depository receipts, which are only a representation of the stock, issued by a third-party bank rather than by the company itself. However, in practice the two terms are often used interchangeably. Typically, then, financial modeling is understood to mean an exercise in either asset pricing or corporate finance, of a quantitative nature. It is about translating a set of hypotheses about the behavior of markets or agents into numerical predictions. At the same time, "financial modeling" is a general term that means different things to different users; the reference usually relates either to accounting and corporate finance applications or to quantitative finance applications.

Financial modeling Healy; Erik Peek; Victor Lewis Bernard (2007). This is a mathematical model designed to represent (a simplified version of) the performance of a financial asset or portfolio of a business, project, or any other investment. Interest Group Krishna G. Business analysis and valuation: text and cases. Cengage Learning Financial modeling is the task of building an abstract representation (a model) of a real world financial situation. Palepu; Paul M
