Arthur MacNalty In 1908, early Sir Arthur Salusbury MacNalty (20 October 1880 – 11 April 1969) was the 8th Chief Medical Officer of the United Kingdom. He was a pioneer in the modern discipline of public health and in the speciality of preventive medicine. Arthur MacNalty was also a ground breaking medical scientist. In 1908, early in his career, he joined with the Welshman Thomas Lewis (cardiologist) to demonstrate that tracings from the nascent science of electrocardiography (ECG) could be used as a tool for diagnosing heart block. This use of electrocardiography to diagnose heart block was the earliest use of ECG technology in cardiology and clinical medicine. Arthur MacNalty was also a ground breaking medical scientist. In the 1930s, MacNalty became among the earliest public health authorities, if not the earliest, to warn against the serious medical dangers of fad dieting (slimming. – 11 April 1969) was the 8th Chief Medical Officer of the United Kingdom ee1f759424
