RMS Campania The following year, Lucania won the Blue Riband RMS Campania was a British ocean liner owned by the Cunard Line, built by Fairfield Shipbuilding and Engineering Company of Govan, Scotland, and launched on Thursday, 8 September 1892. voyage in 1893, she won the prestigious Blue Riband, previously held by the Inman Liner SS City of Paris bb5b6306d1

In many cases, however, vibration is undesirable, wasting energy and creating unwanted sound. For example, the vibrational motions of engines, electric motors, or any mechanical device in operation are typically unwanted. Such vibrations could be caused by imbalances in the... bb5b6306d1 Identical in dimensions and specifications to her sister ship RMS Lucania, Campania was the largest and fastest passenger liner afloat when she entered service in 1893. She crossed the Atlantic in less than six days, and on her second voyage in 1893, she won the prestigious Blue Riband, previously held by the Inman Liner SS City of Paris. The following year, Lucania won the Blue Riband and kept the title until 1898 - Campania being the marginally slower of the two sisters. bb5b6306d1

Vibration Vibration may be deterministic if the oscillations can be characterised precisely (e. the periodic motion of a pendulum), or random if the oscillations can only be analysed statistically (e. g. the movement of a tire on a gravel road). The method of logarithmic decrement becomes less and less precise as the damping ratio increases past about 0.5; it does not apply at all for a damping ratio greater than 1.0 because the system is overdamped. bb5b6306d1 $\{\displaystyle \delta \}$ bb5b6306d1

Dashpot for producing gradual descent in a piece of mechanism or for preventing vibration or sudden motion, consisting of a cylinder or chamber containing liquid A dashpot, also known as a damper, is a mechanical device that resists motion via viscous damping. It is commonly used in conjunction with a spring. The resulting force is proportional to the velocity, but acts in the opposite direction, slowing the motion and absorbing energy bb5b6306d1

Coulomb damping John Wiley & Sons, Inc. Structural Vibrations: Theory and Applications (1st ed. Inman, Daniel (2001).). ISBN 0-471-37084-3. Engineering Vibration (2nd ed Coulomb damping is a type of constant mechanical damping in which the system's kinetic energy is absorbed via sliding friction (the friction generated by the relative motion of two surfaces that press against each other). Coulomb damping is a common damping mechanism that occurs in machinery bb5b6306d1

, is used to find the damping ratio of an underdamped system in the time domain. bb5b6306d1

Vibration can be desirable: for example, the motion of a tuning fork, the reed in a woodwind instrument or harmonica, a mobile phone, or the cone of a loudspeaker. bb5b6306d1
