Current extinction rates are estimated at 100 to 1,000 times higher than natural background extinction rates and are accelerating. Over the past 100–200 years, biodiversity loss has reached such... d0a99e5916

Holocene extinction Many of these extinctions are undocumented, as the species are often undiscovered before their extinctions. Human civilization The Holocene extinction, also referred to as the Anthropocene extinction or the sixth mass extinction, is an ongoing extinction event caused exclusively by human activities during the Holocene epoch. past 130,000 years, avian functional diversity has declined precipitously and disproportionately relative to phylogenetic diversity losses. This extinction event spans numerous families of plants and animals, including mammals, birds, reptiles, amphibians, fish, and invertebrates, impacting both terrestrial and marine species. Widespread degradation of biodiversity hotspots such as coral reefs and rainforests has exacerbated the crisis d0a99e5916
