Electromod Motor Trend. Most electromods are one-off custom vehicles performed by specialty repair shops and hobbyists, but starting in the late 2010s, automobile manufacturers have been building their own electromods, sometimes with the assistance of specialty shops, to publicize their shift to battery electric powertrains and to build interest in crate engine EV drivetrain products.

Retrieved 28 September An electromod is a vehicle that has been restored and modified by converting its drivetrain to operate as an electric vehicle (EV). Retrieved 6 October 2022. The term is a portmanteau of electrification and restomod, itself a portmanteau of restoration and modification, a process which traditionally has been associated with classic cars.
