BMC A-series engine Many changes were made for the initial OHV Nissan C engine and the succeeding E and E-1. An The Austin Motor Company A-series is a British small straight-4 automobile engine. Launched in 1951 with the Austin A30, production lasted until 2000 in the Mini. The cylinder head for the overhead-valve version of the A-series. The camshaft ran in the cylinder block, driven by a single-row chain for most applications, and with tappets sliding in the block, accessible through pressed steel side covers for most applications, and with overhead valves operated through rockers. It used a cast-iron block and cylinder head, and a steel crankshaft with three main bearings. The cylinder blocks are not interchangeable between versions intended for conventional end-on mounted gearboxes and the 'in-sump' transaxle used on British Motor Corporation/British Leyland front wheel drive models such as the Mini. particularly the B-Series, was licensed by Nissan of Japan c75cb18c5f

Outboard motor Honda Marine Group, Mercury Marine, Mercury Racing, Nissan Marine, Suzuki Marine, Tohatsu Outboards, Yamaha Marine, and China Oshen-Hyfong marine have An outboard motor is a propulsion system for boats, consisting of a self-contained unit that includes engine, gearbox and propeller or jet drive, designed to be affixed to the outside of the transom. Unlike inboard motors, outboard motors can be easily removed for storage or repairs. They are the most common motorised method of propelling small watercraft. The skeg also acts as a rudder when the engine is not running. As well as providing propulsion, outboards provide steering control, as they are designed to pivot over their mountings and thus control the direction of thrust
