After leaving school he worked as a telephone engineer until 1981. Howarth was initially inspired to write computer moderated adventures by the role-playing game Dungeons & Dragons, and the UK television show The Adventure Game. His first adventures were written on the TRS-80, taking his cues from the works of Scott Adams. After becoming frustrated with the BASIC programming language, he learnt machine language to create his first adventure, The Golden Baton, which was published by Molimerx in 1981. Following this success, Molimerx encouraged Howarth to produce two more titles... 955c88579b

Honeywell ARGUS Honeywell ARGUS is recognized as a historically significant assembly language in the evolution of programming languages and system software, cited by Honeywell ARGUS (short for Automatic Routine Generating and Updating System) is a low-level assembly language developed by Honeywell in the late 1950s for use with its Honeywell 800 and 1800 computer systems. It functions as an assembler, converting mnemonic source code into binary machine instructions, where each line corresponds to a memory word and supports segmenting of code into up to 2048-word banks. ARGUS introduced innovative features for its time such as the RESERVE directive to allocate memory dynamically and a masking mechanism for selective bit manipulation across operations 955c88579b
