"Bates' Guide to Physical - Whispered pectoriloquy refers to an increased loudness of whispering noted during auscultation with a stethoscope on the lung fields on a patient's torso 28d0aee40a

The information gathered from the physical examination, along with the medical history, is synthesized in order to produce a differential diagnosis and treatment plan... 28d0aee40a

Abdominal examination Palpation of the patient's abdomen. Depending on the need to test for specific diseases such as ascites, special tests may be performed as a part of the physical examination. An abdominal examination is a portion of the physical examination which a physician or nurse uses to clinically observe the abdomen of a patient for signs An abdominal examination is a portion of the physical examination which a physician or nurse uses to clinically observe the abdomen of a patient for signs of disease. Finally, percussion (tapping) of the patient's abdomen and abdominal organs. The abdominal examination is conventionally split into four different stages: first, inspection of the patient and the visible characteristics of their abdomen. Auscultation (listening) of the abdomen with a stethoscope. An abdominal examination may be performed because the physician suspects a disease of the organs inside the abdominal cavity (including the liver, spleen, large 28d0aee40a

Pulmonary examination Bickley, Lynn S. If there are signs of respiratory disease, the physician may order additional tests including medical imaging, such as a chest X-ray or CT scan, or laboratory tests, such as a complete blood count. OCLC 957964383 The pulmonary examination or respiratory examination is the portion of the physical examination where the physician examines the respiratory system for signs of disease. ISBN 9781469893419. diagnosis and treatment plan. It is performed as a part of a complete physical examination, or the physician may choose to perform a focused respiratory exam. (2017). Classically, it is performed after the HEENT examination, and consists of four stages: inspection, palpation, percussion, and auscultation. Bates's guide to physical examination and history taking. Wolters Kluwer

Usually spoken sounds of a whispered volume by the patient would not be heard by the clinician auscultating a lung field with a stethoscope. However, in areas of the lung where there is lung consolidation, these whispered spoken sounds by the patient (such as saying 'ninety-nine') will be clearly heard through the stethoscope. This increase in sound exists because sound travels faster and thus with lower loss of intensity through liquid or solid ("fluid mass" or "solid mass," respectively, in the lung) versus gaseous (air in the lung) media. Whispered pectoriloquy is a clinical test typically performed during a medical physical examination... The cardiac examination is based on the different methods of evaluation, comprising the following sections: measurement of vital signs; inspection and palpation, percussion and auscultation, pulmonary examination, abdominal examination and peripheral vascular examination. The evaluation of a real patient will require switching between the different methods and even different organs to save time... The four steps of the respiratory exam are inspection, palpation, percussion, and auscultation of respiratory sounds, normally first carried out from the back of the chest.

Cardiovascular examination Bates's Guide to Physical Examination and History Taking (Twelfth ed. ISBN 9781469893419 The cardiovascular examination is a portion of the physical examination that involves evaluation of the cardiovascular system. 1064. p. LWW. The exact contents of the examination will vary depending on the presenting complaint but a complete examination will involve the heart (cardiac examination), lungs (pulmonary examination), belly (abdominal examination) and the blood vessels (peripheral vascular examination). Bickley, Lynn S. ISBN 978-1945564024.). (September 6, 2016)

Respiratory examination ; Szilagyi, Peter (2017). ISBN 978-0-443-05949-0. p. Wolters Kluwer. Bickley, Lynn S.

317. Bates's Guide to Physical Examination and History-Taking. Bickley A respiratory examination, or lung examination, is performed as part of a physical examination, in response to respiratory symptoms such as shortness of breath, cough, or chest pain, and is often carried out with a cardiac examination. ISBN 978-1469893419 28d0aee40a
