

Digestive System Quiz And Answers

HCV is spread primarily by blood-to-blood contact associated with injection drug use, poorly sterilized... 3649e37751

Hyperlipidemia The term hyperlipidemia refers to the laboratory finding itself and is also used as an umbrella term covering any of various acquired or genetic disorders that result in that finding. elevated chylomicrons, the particles that transfer fatty acids from the digestive tract to the liver Familial apoprotein CII deficiency (type Ib), a condition Hyperlipidemia is abnormally high levels of any or all lipids (e. fats, triglycerides, cholesterol, phospholipids) or lipoproteins in the blood. Hyperlipidemia is usually chronic and requires ongoing medication to control blood lipid levels. Hyperlipidemia represents a subset of dyslipidemia and a superset of hypercholesterolemia. g 3649e37751

Omeprazole It is also used to prevent upper gastrointestinal bleeding in people who are at

high risk. "Association between proton pump inhibitor use and anemia: a retrospective cohort study". It is also available in the fixed-dose combination medication omeprazole/sodium bicarbonate as Zegerid and as Konvomep. 56 (8): 2349-2353. doi:10. Digestive Diseases and Sciences. 1007/s10620-011-1589-y Omeprazole, sold under the brand names Prilosec and Losec among others, is a medication used in the treatment of gastroesophageal reflux disease (GERD), peptic ulcer disease, and Zollinger-Ellison syndrome. Omeprazole is a proton-pump inhibitor (PPI) and its effectiveness is similar to that of other PPIs. It can be taken by mouth or by injection into a vein 3649e37751

Gallstone Gut Feelings: Your Digestive System. The term cholelithiasis may refer to the presence of gallstones or to any disease caused by gallstones, and choledocholithiasis refers to the presence of migrated gallstones within bile ducts. Pymble, NSW: HarperCollins A gallstone is a stone formed within the gallbladder from precipitated bile components. Quick Answers Surgery - via The McGraw-Hill Companies. Pancreatitis". Roizen MF, Oz MC (2005) 3649e37751

The uses of bisphosphonates include the prevention and treatment of osteoporosis, Paget's disease of bone, bone metastasis (with or without hypercalcemia), multiple myeloma,

primary hyperparathyroidism, osteogenesis imperfecta, fibrous dysplasia... 3649e37751 Common foods involved include cow's milk, peanuts, eggs, shellfish, fish, tree nuts, soy, wheat, and sesame. The common allergies vary depending on the country. Risk factors include a family history of allergies, vitamin D deficiency, obesity, and high levels of cleanliness. Allergies occur when immunoglobulin E (IgE), part of the body... 3649e37751 Evidence shows that they reduce the risk of fracture in post-menopausal women with osteoporosis. 3649e37751 Hyperlipidemias... 3649e37751 Liniments are typically sold to relieve pain and stiffness, such as from muscular aches and strains, and arthritis. These are typically formulated from alcohol, acetone, or similar quickly evaporating solvents and contain counterirritant aromatic chemical compounds, such as methyl salicylate, benzoin resin, menthol, and capsaicin. They produce a feeling of warmth within the muscle of the area they... 3649e37751 Bone tissue undergoes constant remodeling and is kept in balance (homeostasis) by osteoblasts creating bone and osteoclasts destroying bone. Bisphosphonates inhibit the digestion of bone by encouraging osteoclasts to undergo apoptosis, or cell death, thereby slowing bone loss. 3649e37751 It is named after Edward C. Heyde, MD, who first noted the association in 1958. It is caused by cleavage of Von Willebrand factor (vWF) due to high shear stress forces from aortic valvular stenosis. This results in Von Willebrand disease type IIA (acquired). 3649e37751 Common side effects

include nausea, vomiting, headaches, abdominal pain, and increased intestinal gas. Serious side effects may include *Clostridioides difficile* colitis, an increased risk of pneumonia, an increased risk of bone fractures... 3649e37751 Lipids (water-insoluble molecules) are transported in a protein capsule. The size of that capsule, or lipoprotein, determines its density. The lipoprotein density and type of apolipoproteins it contains determines the fate of the particle and its influence on metabolism. 3649e37751

Heyde's syndrome 1007/bf01255601 Heyde's syndrome is a syndrome of gastrointestinal bleeding from angiodysplasia in the presence of aortic stenosis. (1974). "Idiopathic gastrointestinal bleeding and aortic stenosis"; 19 (5): 393-8. The American Journal of Digestive Diseases. doi:10 3649e37751

Hepatitis C The virus persists in the liver, becoming chronic, in about 70% of those initially infected. National Institute of Diabetes and Digestive and Kidney Diseases. Retrieved 2020-06-19. Early on, chronic infection typically has no symptoms. "Viral Hepatitis: A through E and Beyond"; Archived from the Hepatitis C is an infectious disease caused by the hepatitis C virus (HCV) that primarily affects the liver; it is a type of viral hepatitis. Early symptoms can include fever, dark urine, abdominal pain, and yellow tinged skin. April

2012. Over many years however, it often leads to liver disease and occasionally cirrhosis. During the initial infection period, people often have mild or no symptoms. In some cases, those with cirrhosis will develop serious complications such as liver failure, liver cancer, or dilated blood vessels in the esophagus and stomach 3649e37751

Liniment Retrieved 2020-10-25. "Answers to last week's quiz (#329)"
Strategist Team (November 11, 2013). Some liniments have a viscosity similar to that of water; others are lotion or balm; still, others are in transdermal patches, soft solid sticks, and sprays. Archived from the original Liniment (from Latin: linere, meaning "to smear, anoint"), also called embrocation and heat rub, is a medicated topical preparation for application to the skin. Liniment usually is rubbed into the skin, which the active ingredients penetrate. Business Standard India 3649e37751

Hepatitis is most commonly caused by the virus hepatovirus A, B, C, D, and E. Other viruses can also cause liver inflammation, including cytomegalovirus, Epstein-Barr virus, and yellow fever virus. Other common causes of hepatitis... 3649e37751

Human rights in Egypt under the Supreme Council of the Armed Forces The SCAF, which

consists of a body of 20 senior officers in the Egyptian military, was handed the power to govern Egypt after the ouster of President Hosni Mubarak on 11 February 2011 as a consequence of the revolution. The Supreme Council of the Armed Forces (SCAF) Arabic: المجلس الأعلى للقوات المسلحة, al-Mağlis al-'A'lā lil-Quwwāt al-Musallaḥah in particular have been the focus of concerns about human rights violations. Nagati has a heart condition as well as digestive problems which Human rights in the post-Mubarak transition have been the subject of concern and controversy since the 2011 Egyptian revolution. for 15 days and was transferred on 29 June to military prison pending a military trial 3649e37751

Most people with gallstones (about 80%) are asymptomatic. However, when a gallstone obstructs the bile duct and causes acute cholestasis, a reflexive smooth muscle spasm often occurs, resulting in an intense cramp-like visceral pain in the right upper part of the abdomen known as a biliary colic (or "gallbladder attack"). This happens in 1-4% of those with gallstones each year. Complications from gallstones may include inflammation of the gallbladder (cholecystitis), inflammation of the pancreas (pancreatitis), obstructive... 3649e37751

Food allergy The symptoms of the allergic reaction may range from mild to severe. doi:10.

This typically occurs within minutes to several hours of exposure. When the symptoms are severe, it is known as anaphylaxis. They may include itchiness, swelling of the tongue, vomiting, diarrhea, hives, trouble breathing, or low blood pressure. A food intolerance and food poisoning are separate conditions, not due to an immune response. 2013.

Epidemiology, pathogenesis, diagnosis, and treatment". 133 (2): 291-307, quiz 308. 11
A food allergy is an abnormal immune response to food. 1016/j. The Journal of Allergy and Clinical Immunology 3649e37751

Hepatitis H. Some people or animals with hepatitis have no symptoms, whereas others develop yellow discoloration of the skin and whites of the eyes (jaundice), poor appetite, vomiting, tiredness, abdominal pain, and diarrhea. Summerskill, W. "Treatment for NAFLD & NASH NIDDK". Retrieved 4 September 2023. Chronic hepatitis may progress to scarring of the liver (cirrhosis), liver failure, and liver cancer. National Institute of Diabetes and Digestive and Kidney Diseases. Acute hepatitis can resolve on its own, progress to chronic hepatitis, or (rarely) result in acute liver failure. ; Korman - Hepatitis is inflammation of the liver tissue. Hepatitis is acute if it resolves within six months, and chronic if it lasts longer than six months 3649e37751

Bisphosphonate They are the most commonly prescribed to treat osteoporosis. If these are ineffective or if the person develops digestive tract problems, intravenous pamidronate Bisphosphonates are a class of drugs that prevent the loss of bone density, used to treat osteoporosis and similar diseases. bisphosphonate drugs are alendronate and risedronate 3649e37751
