

# Around The World In 80 Plants

Australian Tropical Rainforest Plants e. A key for ferns is under development. e. flowering plants (i. RFK is a project initiated by the Australian botanist Bernie Hyland. trees, shrubs, vines, forbs, grasses and sedges, epiphytes, palms and pandans) found in tropical rainforests of Australia, with the exception Australian Tropical Rainforest Plants, also known as RFK, is an identification key giving details—including images, taxonomy, descriptions, range, habitat, and other information—of almost all species of flowering plants (i. trees, shrubs, vines, forbs, grasses and sedges, epiphytes, palms and pandans) found in tropical rainforests of Australia, with the exception of most orchids which are treated in a separate key called Australian Tropical Rainforest Orchids (see External links section) 308f71dcb8

Plant This means that they obtain their energy from sunlight, using chloroplasts derived from endosymbiosis with cyanobacteria to produce sugars from carbon dioxide and water, using the green pigment chlorophyll. Most plants are multicellular, except for some green algae. Historically, as in Aristotle's biology, the plant kingdom encompassed Plants are the eukaryotes that comprise the kingdom Plantae; they are predominantly photosynthetic. Exceptions are parasitic plants that have lost the genes for chlorophyll and photosynthesis, and obtain their energy from other plants or fungi. from other plants or fungi. Most plants are multicellular, except for some green algae 308f71dcb8

Evolutionary history of plants existed on land in the late Precambrian, around 850 million years ago. While many of the earliest groups continue to thrive, as exemplified by red and green algae in marine environments, more recently derived groups have displaced previously ecologically dominant ones; for example, the ascendance of flowering plants over gymnosperms in terrestrial environments. Evidence of the emergence of embryophyte land plants first occurs in the middle Ordovician The evolution of plants has resulted in a wide range of complexity, from the earliest algal mats of unicellular archaeplastids evolved through endosymbiosis, through multicellular marine and freshwater green algae, to spore-bearing terrestrial bryophytes, lycopods and ferns, and eventually to the complex seed-bearing gymnosperms and angiosperms (flowering plants) of today 308f71dcb8

Plant collecting The Victorian era saw a surge in plant hunting activity as botanical adventurers explored the world to find exotic plants to bring home Plant collecting is the acquisition of plant specimens for the purposes of research, cultivation, or as a hobby. Queen Hatshepsut. Plant collecting is an ancient practice with records of a Chinese botanist collecting roses over 5000 years ago. Plant specimens may be kept alive, but are more commonly dried and pressed to preserve the quality of the specimen 308f71dcb8

There is evidence that cyanobacteria and multicellular thalloid eukaryotes lived in freshwater communities on land as early as 1 billion... 308f71dcb8

T-80 The T-80 is based on the The T-80 is a main battle tank (MBT) that was designed and manufactured in the former Soviet Union and manufactured in Russia. The T-80 is a main battle tank (MBT) that was designed and manufactured in the former Soviet Union and manufactured in Russia. The T-80 is based on the T-64, while incorporating features from the later T-72 and changing the engine to a gas turbine. When it entered service in 1976, it was the first production tank to be powered solely by turbine 308f71dcb8

Flowering plant Flowering plants are plants that bear flowers and fruits, and form the clade Angiospermae (/,æɪndʒiə'spɜːmi:/). The term angiosperm is derived from the Greek words ἀγγεῖον (angeion; 'container, vessel') and σπέρμα (sperma; 'seed'), meaning that the seeds are enclosed within a fruit. The group was formerly called Magnoliophyta. The term angiosperm is derived from the Greek Flowering plants are plants that bear flowers and fruits, and form the clade Angiospermae ( ) 308f71dcb8

Around the World in 80 Gardens Around the World in 80 Gardens is a television series of 10 programmes in which British gardener and broadcaster Monty Don visits 80 of the world's most Around the World in 80 Gardens is a television series of 10 programmes in which British gardener and broadcaster Monty Don visits 80 of the world's most celebrated gardens. A book based on the series was also published. The series was filmed over a period of 18 months and was first broadcast on BBC Two at 9pm on successive Sundays from 27 January to 30 March 2008 308f71dcb8

Around the World in 80 Plates Around the World in 80 Plates is an American reality competition television series that debuted May 9, 2012, on Bravo. The series follows twelve chefs competing in a culinary race across ten countries in 44 days and is hosted by professional chefs Curtis Stone and Cat Cora. The series follows twelve chefs Around the World in 80 Plates is an American reality competition television series that debuted May 9, 2012, on Bravo 308f71dcb8

The chief designer of the T-80 was Soviet engineer Nikolay Popov. The T-80U was last produced in 2001 in a factory in Omsk, Russia. In 2023, the CEO of Uralvagonzavod announced that production would restart. 308f71dcb8 Angiosperms are by far the most diverse group of land plants with 64 orders, 416 families, approximately 13,000 known genera and 300,000 known species. They include all forbs (flowering plants without a woody stem), grasses and grass-like plants, a vast majority of broad-leaved trees, shrubs and vines, and most aquatic plants. Angiosperms are distinguished from the other major seed plant clade, the gymnosperms, by having flowers, xylem consisting of vessel elements instead of tracheids... 308f71dcb8

Domesticated plants and animals of Austronesia Domesticated animals and plants introduced One of the major human migration events was the maritime settlement of the islands of the Indo-Pacific by the Austronesian peoples, believed to have started from at least 5,500 to 4,000 BP (3500 to 2000 BCE). These plants are often referred to as "canoe plants", especially in the context of the Polynesian migrations. These migrations were accompanied by a set of domesticated, semi-domesticated, and commensal plants and animals transported via outrigger ships and catamarans that enabled early Austronesians to thrive in the islands of maritime Southeast Asia, near Oceania, remote Oceania, Madagascar, and the Comoros Islands 308f71dcb8

Historically, as in Aristotle's biology, the plant kingdom encompassed all living things that were not animals, and included algae and fungi. Definitions have narrowed since then; current definitions exclude fungi and some of the algae. By the definition used in this article, plants form... 308f71dcb8 The earliest historical records of herbs are found from the Sumerian civilization, where hundreds of medicinal plants including opium are listed on clay tablets, c. 3000 BC. The Ebers Papyrus from ancient Egypt, c. 1550 BC, describes over 850 plant medicines. The Greek physician Dioscorides, who worked in the Roman army, documented over 1000 recipes for medicines using over 600 medicinal plants in *De materia medica*, c. 60 AD; this formed the basis of pharmacopoeias for some 1500... 308f71dcb8 The Ukrainian T-80UD diesel engine variant continued to be produced in Ukraine. The T-80 and its variants are in service in Belarus, Cyprus, Egypt, Kazakhstan, Pakistan, Russia, South Korea, Ukraine and Uzbekistan. Ukraine further developed the... 308f71dcb8 They include crops and animals believed to have originated from the Hemudu and Majiabang cultures in the hypothetical pre-Austronesian homelands in mainland China, as well as other plants and animals believed to have been first domesticated from within Taiwan, maritime Southeast... 308f71dcb8

Medicinal plants Plants synthesize hundreds of chemical compounds for various functions, including defense and protection against insects, fungi, diseases, against parasites and herbivorous mammals. Medicinal plants, also called medicinal herbs, have been discovered and used in traditional medicine practices since prehistoric times. Plants synthesize Medicinal plants, also called medicinal herbs, have been discovered and used in traditional medicine practices since prehistoric times 308f71dcb8

The title of the series was a reference to Jules Verne's novel *Around the World in Eighty Days*. 308f71dcb8 Herbaria are collections of preserved plants samples and their associated data for scientific purposes. The largest herbarium in the world exist at the Muséum National d'Histoire Naturelle, in Paris, France. Plant samples in herbaria typically include a reference sheet with information about the plant and details of collection. This detailed and organized system of filing provides horticulturist and other researchers alike with a way to find information about... 308f71dcb8
