Wikipedia:WikiProject Military history/Assessment/2011/Promoted by a safety harness along with the engine, which was an outboard motor manufactured by Mercury Marine; not clear whether the engine is on the platform - This Military history WikiProject page is an archive, log collection, or currently inactive page; it is kept primarily for historical interest

Suzuki has over 45,000 employees and has 35 production facilities in 23 countries, and 133 distributors in 192 countries. The worldwide sales volume of automobiles is the world's tenth largest, while domestic sales volume is the third largest in the country. → Review alert box → Contest entries Assessment Main page News & open tasks Main page Main project page Main page → Bugle newsroom Special projects Coordination The sixth generation marked several functional design changes and an expansion of the model line. For 1973, the regular cab F-350 became available with a wide "Styleside" bed for the first time. For 1974, a "SuperCab" extended cab pickup truck was introduced, between the two-door standard cab and the four-door crew cab. For 1975, the F-150 was introduced; a higher-payload version of the F-100 (intended to circumvent...

Power-to-weight ratio It is also used as a measurement of performance of a vehicle as a whole, with the engine's power output being divided by the weight (or mass) of the vehicle, to give a metric that is independent of the vehicle's size. "1967 Mercury Cougar technical and mechanical specifications". autoevolution. 1962. Power-to-weight is often quoted by manufacturers at the peak value, but the actual value may vary in use and variations will affect performance. "Sunbeam 1,000 hp Mystery Slug LSR Car". conceptcarz. 5 September Power-to-weight ratio (PWR, also called specific power, or power-to-mass ratio) is a calculation commonly applied to engines and mobile power sources to enable the comparison of one unit or design to another. Power-to-weight ratio is a measurement of actual performance of any engine or power source.
