0 tablet unearthed at Kish (dating to as early as 700 BC), the scribe Bêl-bân-aplu used three hooks as a placeholder in the same Babylonian system. By 300 BC 0 (zero) is a number representing an empty quantity. Multiplying any number by 0 results in 0, and consequently division by zero has no meaning in arithmetic. Adding (or subtracting) 0 to any number leaves that number unchanged; in mathematical terminology, 0 is the additive identity of the integers, rational numbers, real numbers, and complex numbers, as well as other algebraic structures bbe85d4407

Intelligent tutoring system ITSs have the common goal of enabling learning in a meaningful and effective manner by using a

variety of computing technologies. They could guess their answers and have correct answers without deep understanding of the concepts. An intelligent tutoring system (ITS) is a computer system that imitates human tutors and aims to provide immediate and customized instruction or feedback to learners, usually without requiring intervention from a human teacher. There is a close relationship between intelligent tutoring, cognitive learning theories and design; and there is ongoing research to improve the effectiveness of ITS. There are many examples of ITSs being used in both formal education and professional settings in which they have demonstrated their capabilities and limitations. An ITS typically aims to replicate the demonstrated benefits of one-to-one, personalized tutoring, in contexts where students have trouble answering the questions.
