Nurses are not doctors' assistants and practice nursing in a wide variety of specialties and departments. They may act in that capacity, such as in the emergency department or in trauma care, but more often independently care for their patients or assist other nurses. RNs treat patients, record their medical history, provide emotional support, and provide follow-up care. Nurses also help doctors perform diagnostic tests. 9afad6c91f Nurses develop a plan of care, working collaboratively with physicians, therapists, patients, patients' families, and other team members that focuses on treating illness to improve quality of life. 9afad6c91f work groups (meso-level) 9afad6c91f
