Its foundation in Monaco during January 1959 makes it one of the world's oldest underwater diving organisations. October 2012 428850cc6c

William Francis Ganong In his private life he contributed to the historical and geographical understanding of his native New Brunswick. His botany career was spent mainly as a professor at Smith College in Northampton, Massachusetts. By authoring several books including The Teaching Botanist, A Laboratory Manual for Plant Physiology William Francis Ganong (19 February 1864 – 7 September 1941) was a Canadian botanist, historian and cartographer. of learning for students of botany and horticulture 428850cc6c

Geotechnical engineering has applications in military engineering, mining engineering, petroleum engineering, coastal engineering, and offshore construction. The fields of geotechnical engineering and engineering geology have overlapping knowledge areas. However, while geotechnical engineering is a specialty of civil

engineering, engineering geology is a specialty of geology. 428850cc6c

She was a science teacher at Hudson's Bay High School in Vancouver, Washington when she was selected in 2004 as an educator mission specialist. In 1995, she worked in Dorothy Marie "Dottie" Metcalf-Lindenburger (born May 2, 1975) is a retired American astronaut. She was the first Space Camp alumna to become an astronaut. As an undergrad, she undertook research with the KECK Consortium for two summers 428850cc6c

Peer instruction Kathie D. It is a student-centered learning approach that involves flipping the traditional classroom. Journal of Geoscience Education. "Assessment and Active Learning Strategies for Introductory Geology Courses". (2018). doi:10 Peer instruction is a teaching method popularized by Harvard Professor Eric Mazur in the early 1990s. Originally used in introductory undergraduate physics classes at Harvard University, peer instruction is used in various disciplines and institutions around the globe. It expects students to prepare for class by exploring provided materials and then engage with a series of questions about the material in class. 51 (2): 205–216 428850cc6c

Oceanographers draw upon a wide range of disciplines to deepen their understanding of the world's oceans, incorporating insights from astronomy, biology, chemistry, geography, geology, hydrology, meteorology and physics. 428850cc6c

Chronological dating Several dating methods exist, depending on different criteria and techniques, and some very well known examples of disciplines using such techniques are, for example, history, archaeology, geology, paleontology, astronomy and even forensic science, since in the latter it is sometimes necessary to investigate the moment in the past during which the death of a cadaver occurred. (2020-01-08), "Overview of Relative and Absolute Dating", Introductory Physical Geology Laboratory Manual – First Canadian Edition (v. 3 Jan 2020), retrieved - Chronological dating, or simply dating, is the process of attributing to an object or event a date in the past, allowing such object or event to be located in a previously established chronology. This usually requires what is commonly known as a "dating method". These methods are typically identified as absolute, which involves a specified date or date range, or relative, which refers to dating which places artifacts or 428850cc6c

Geotechnical engineering Humans have historically used soil as a material for flood control, irrigation purposes, burial sites Geotechnical engineering, also known as geotechnics, is the branch of civil engineering concerned with the engineering behavior of earth materials. It also relies on knowledge of geology, hydrology, geophysics, and other related sciences. It uses the principles of soil mechanics and rock mechanics to solve its engineering problems. engineering, engineering geology is a specialty of geology 428850cc6c
