"Compressor", 93999ec287 An ice machine, however, particularly if described as 'packaged', is typically be a complete machine including refrigeration, controls, and dispenser, requiring only connection... 93999ec287 The ice generator is the part of the ice machine that actually produces the ice. This includes the evaporator and any associated drives/controls/subframe that are directly involved with making and ejecting the ice into storage. When most people refer to an ice generator, they mean this ice-making subsystem alone, minus refrigeration. 93999ec287
