Although the practice of "Hackintoshing" has existed since the 1980s, a new wave of "Hackintoshing" began as a result of Apple's 2005 transition to Intel processors, away from PowerPC. From that transition to the early 2020s transition to Apple silicon, Mac computers used the same x86 computer architecture as many other desktop PCs, laptops, and servers, meaning that in principle, the code making up macOS systems and software can be run on alternative platforms with minimal... db149f3343 In 2003, the Danish office was closed and all operations moved to the Phoenix location. db149f3343
