List of Ig Nobel Prize winners S. Vanden-Broeck of the University of East Anglia, England, and Belgium, and Joseph Keller of the U. Commenting on the 2006 awards, Marc Abrahams, editor of Annals of Improbable Research and co-sponsor of the awards, said that "[t]he prizes are intended to celebrate the unusual, honor the imaginative, and spur people's interest in science, medicine, and technology". for calculating how to make a teapot spout that does not drip A parody of the Nobel Prizes, the Ig Nobel Prizes are awarded each year in mid-September, around the time the recipients of the genuine Nobel Prizes are announced, for ten achievements that "first make people laugh, and then make them think". All prizes are awarded for real achievements, except for three in 1991 and one in 1994, due to an erroneous press release 42adee2e41

The performance and endurance of SSDs vary depending on the number of bits stored per cell, ranging from high-performing single-level cells (SLC) to more affordable but slower quad-level cells (QLC). In addition to flash-based SSDs, other technologies such as 3D XPoint offer faster speeds and higher endurance through different data storage mechanisms. 42adee2e41

Optical fiber Specially designed fibers are also used for a variety of other applications, such as fiber optic sensors and fiber lasers. Fibers are used instead of metal wires because signals travel along them with less loss and are immune to electromagnetic interference. Such fibers find wide usage in fiber-optic communications, where they permit transmission over longer distances and at higher bandwidths (data transfer rates) than electrical cables. spaces, as in the case of a fiberscope. Specially designed fibers are also used for a variety of other applications, such as fiber optic sensors and fiber An optical fiber, or optical fibre, is a flexible glass or plastic fiber that can transmit light from one end to the other. Fibers are also used for illumination and imaging, and are often wrapped in bundles so they may be used to carry light into, or images out of confined spaces, as in the case of a fiberscope 42adee2e41
