History of film technology
When the film medium
came about in the 19th
century, there already was a
centuries old tradition of
screening moving images
through shadow play and
the magic lantern that were

very popular with audiences in many parts of the world. Especially the magic lantern influenced much of the projection technology, exhibition practices and cultural implementation of film. Between 1825 and 1840, the relevant technologies of stroboscopic animation, photography and stereoscopy were introduced. strip of 35 mm black-and-white film. The projector had a corresponding triad of lenses. To reduce the strain imposed on the film as the mechanism in The history of film technology traces the development of techniques for the recording, construction and presentation of motion pictures. For much of the rest of the century, many engineers and inventors tried to combine all these new technologies and the much older technique of

"Creatures of the night: Chronotypes and the Dark Triad traits". doi:10 A parody of the Nobel Prizes, the Ig Nobel Prizes are awarded each year in mid-September, around the time the recipients of the genuine Nobel Prizes are announced, for ten achievements that "first make people laugh, and then make them think". Commenting on the 2006 awards, Marc Abrahams, editor of Annals of Improbable Research and co-sponsor of the awards, said that "[t]he prizes are intended to celebrate the unusual, honor the imaginative, and spur people's interest in science, medicine, and technology" 48c0322dc3
