Prime number 360. A natural number greater than 1 that is not prime is called a composite number. Primes are central in number theory because of the fundamental theorem of arithmetic: every natural number greater than 1 is either a prime itself or can be factorized as a product of primes that is unique up to their order. Leff, Lawrence S. Math Workbook for the SAT I. Golden Press. OCLC 6975809. However, 4 is composite because it is a product (2×2) in which both numbers are smaller than 4. Space.
