Project Plowshare The program was organized in June 1957 as part of the worldwide Atoms for Peace efforts. A similar program was carried out in the Soviet Union under the name Nuclear Explosions for the National Economy, although the Soviet program consisted of 124 tests. 1961) is available for free viewing and download at the Project Plowshare was the overall United States program for the development of techniques to use nuclear explosives for peaceful construction purposes. As part of the program, 35 nuclear warheads were detonated in 27 separate tests. The short film Plowshare (Part II) (ca. for free viewing and download at the Internet Archive 2beead3779

Aluminium It visually resembles silver, both in its color and in its great ability to reflect light. It is soft, nonmagnetic, and ductile. It has a density lower than other common metals, about one-third that of steel. Aluminium (or aluminum in North American English) is a chemical element; it has symbol Al and atomic number 13. The radioactivity of ²⁶Al leads to it being used in radiometric dating. (1998–present) for aluminum futures on the global commodities market The short film Aluminum is available for free viewing and download at the Internet Archive. Aluminium has a great affinity towards oxygen, forming a protective layer of oxide on the surface when exposed to air. It has one stable isotope, ²⁷Al, which is highly abundant, making aluminium the 12th-most abundant element in the universe 2beead3779

Successful demonstrations of non-combat uses for nuclear explosives include rock blasting, stimulation of tight gas, chemical element manufacture, unlocking some of the mysteries of the R-process of stellar nucleosynthesis and probing the composition of the Earth's deep crust, creating reflection seismology vibroseis... 2beead3779

Hydrogeology Hydrogeology (hydro- meaning water, and -geology meaning the study of the Earth) is the area of geology that deals with the distribution and movement of Hydrogeology (hydro- meaning water, and -geology meaning the study of the Earth) is the area of geology that deals with the distribution and movement of groundwater in the soil and rocks of the Earth's crust (commonly in aquifers). The terms groundwater hydrology, geohydrology, and hydrogeology are often used interchangeably, though hydrogeology is the most commonly used 2beead3779

Philosophical Transactions of the Royal Society The use of the word philosophical in the title refers to natural philosophy, which was the equivalent of what would now be generally called science. It became an official society publication in 1752. In its earliest days, it was a private venture of the Royal Society's secretary. It was established in 1665, making it the second journal in the world exclusively devoted to science, after the Journal des sçavans, and therefore also the world's longest-running scientific journal. Yellowstone National Park 1932) is available for free viewing and download at the Yellowstone National Park is a national park of the United States located in the northwest corner of the state of Wyoming, with small portions extending into Montana and Idaho. S. The park is known for its wildlife and its many geothermal features, especially the Old Faithful geyser, one of its most popular. It was established by the 42nd U. Grant on March 1, 1872. Congress through the Yellowstone National Park Protection Act and signed into law by President Ulysses S. Yellowstone was the first national park in the US, and is also widely understood to be the first national park in the world. While it represents many types of biomes, the subalpine forest is the most abundant. It

Croatian Natural History Museum 1 million animal specimens. two permanent exhibits in the atrium: the Rock Map of Croatia and the Geological Pole. In 2021 The Croatian Natural History Museum (Croatian: Hrvatski prirodoslovni muzej) is the oldest and biggest natural history museum and the main body for natural history research, preservation and collection in Croatia. The National Museum was later split up into five museums, three of which were in 1986 merged as departments of the newly named Croatian Natural History Museum. Located on Dimitrije Demeter Street in Gornji Grad, one of the oldest neighbourhoods of the Croatian capital Zagreb, it owns one of the biggest museum collections in Croatia, with over 2 million artefacts, including over 1. It was founded in 1846 as the "National Museum". The museum contains a large scientific library open to the public, and publishes the first Croatian natural history scientific.
