Personality psychology is a branch of psychology that examines personality and its variation among individuals. It aims to show how people are individually different due to psychological forces 9e21fd3ca9

Sigmund Freud, the founder of psychoanalytic theory, developed the concept of resistance as he worked with patients who suddenly developed uncooperative behaviors during the analytic session. Freud reasoned that an individual that is suffering from a psychological affliction, which in psychoanalytic theory is derived from the presence of repressed illicit impulses or thoughts, may engage in efforts to impede attempts to confront such unconscious impulses or thoughts. 9e21fd3ca9 Documenting how personalities develop 9e21fd3ca9

Psychology as a field of experimental study began in 1854 in Leipzig, Germany, when Gustav Fechner created the first theory of how judgments about sensory experiences are made and how to experiment on them. Fechner's theory, recognized today as Signal Detection Theory, foreshadowed the development of statistical theories of comparative judgment and thousands of experiments based on his ideas (Link, S. W. Psychological Science, 1995). In 1879, Wilhelm Wundt founded the first psychological laboratory dedicated exclusively to psychological research in Leipzig, Germany. Wundt was...
