L. Thorndike developed an early scientific approach to testing students, it was his assistant Benjamin D. Wood who developed the multiple-choice test. Multiple-choice testing increased in popularity in the mid-20th century when scanners and data-processing machines were developed to check the result. Christopher P. Sole created the first multiple-choice examinations for computers on... ccbc657800 Archive 435←Archive 437Archive 438Archive 439Archive 440Archive 441→Archive 445 ccbc657800 Systems for co-located audiences combine wireless hardware with presentation software. Systems for remote audiences may use telephones or web polls for audiences watching through television or the internet. Various names are used for this technology, including real-time response, the worm, dial testing, and Audience Response meters. In educational settings, such systems are often called "student response systems" or "personal response systems". The hand-held remote control that students use to convey their responses to questions is often called a "clicker". ccbc657800

Multiple choice response or MCQ (for multiple choice question) is a form of an objective assessment in which respondents are asked to select only the correct answer from the Multiple choice (MC), objective response or MCQ (for multiple choice question) is a form of an objective assessment in which respondents are asked to select only the correct answer from the choices offered as a list. The multiple choice format is most frequently used in educational testing, in market research, and in elections, when a person chooses between multiple candidates, parties, or policies ccbc657800
