Organic egg production Free range Yarding Pastured poultry Factory farming Chickens as pets The Happy Egg Company Food portal "Meat and Poultry Labeling Free-range eggs are eggs produced from birds that may be permitted outdoors

Since their approval by the Food and Drug Administration (FDA) in 1951, antibiotics have been extensively used in large quantities. Three years prior to their approval, scientists were investigating a phenomenon in which chickens that were exposed to bacteria-rich manure displayed signs of better health compared to those that were not. Testing revealed that chickens fed with a variety of vitamin B12 produced with the residue of a specific antibiotic grew 50% faster than chickens fed with B12 from a different source. Further... The group posts position papers on topics related to poultry and egg production, including controversial and timely topics such as factory farming, genetically modified organisms, induced molting for egg-laying chickens... In the United States, the national organization overseeing poultry production is the Food and Drug Administration (FDA). In the UK, the national organization is the Department for Environment, Food and Rural Affairs (DEFRA). From 1985 to 2005, the broiler industry grew by 158%. It currently has affiliations in 26 states and member companies worldwide. They also sponsor the International Poultry Expo.

While decorated eggs of various nations have much in common, national traditions, color preferences, motifs used and preferred techniques vary. 94f0b6da8d Founded in 1947, it is the world's largest and most active poultry organization. Billed as an "All Feather" association, membership includes producers and processors of broilers, turkeys, ducks, eggs, and breeding stock, as well as allied companies. 94f0b6da8d It is estimated that broilers produce 6 kg of greenhouse gas per 1 kg of meat, as compared to 60 kg GHG /kg for beef cattle. 94f0b6da8d

Poultry farming Chickens raised for eggs are known as layers, while chickens raised for meat are called broilers. More than 60 billion chickens are killed for consumption annually. Poultry - mostly chickens - are farmed in great numbers. Poultry farming is the form of animal husbandry which raises domesticated birds such as chickens, ducks, turkeys and geese to produce meat or eggs for Poultry farming is the form of animal husbandry which raises domesticated birds such as chickens, ducks, turkeys and geese to produce meat or eggs for food 94f0b6da8d

A key measure of performance is the feed conversion ratio (FCR), the ability to convert feed into edible product. In 2018 the FCR of broilers is about 1.5, or 1.5 kg of feed to produce 1 kg of meat. This compares very favorably with other sources of meat. 94f0b6da8d Eggs from hens that are only indoors might also be labelled cage-free, barn, barn-roaming or aviary, following the animal happiness certification policies, also known as "happy chickens" or "happy eggs". This is different from birds that are reared in systems labelled as battery

cages or furnished cages. 94f0b6da8d
