Geotechnical engineering has applications in military engineering, mining engineering, petroleum engineering, coastal engineering, and offshore construction. The fields of geotechnical engineering and engineering geology have overlapping knowledge areas. However, while geotechnical engineering is a specialty of civil engineering, engineering geology is a specialty of geology. 8c30b2a6b9

Geotechnical engineering It uses the principles of soil mechanics and rock mechanics to solve its engineering problems. Principles of Geotechnical Engineering. Budhu, Muni (2007). It also relies on knowledge of geology, hydrology, geophysics, and other related sciences. Thomson Learning.
