Power-to-weight ratio “Hauling Grass: We Drive Honda’s 150-MPH Mean Mower V2 Power-to-weight ratio (PWR, also called specific power, or power-to-mass ratio) is a calculation commonly applied to engines and mobile power sources to enable the comparison of one unit or design to another. 285 Seconds, New Guinness Record”. It is also used as a measurement of performance of a vehicle as a whole, with the engine's power output being divided by the weight (or mass) of the vehicle, to give a metric that is independent of the vehicle's size. “Honda Mean Mower Hits 100 MPH in 6. Lawn Mower Goes 150 MPH”. Power-to-weight is often quoted by manufacturers at the peak value, but the actual value may vary in use and variations will affect performance. Power-to-weight ratio is a measurement of actual performance of any engine or power source

Within mechanical engineering, robotics is the design and construction of the physical structures of robots, while in computer science, robotics focuses on robotic automation algorithms. Other disciplines contributing to robotics include electrical, control, software, information, electronic, telecommunication, computer, mechatronic, and materials engineering. Motor oil They typically consist of base oils enhanced with various additives, particularly antiwear additives, detergents, dispersants, and, for multi-grade oils, viscosity index improvers. pan, or sump, at the bottom of the crankcase. The main function of motor oil is to reduce friction and wear on moving parts and to clean the engine from sludge (one of the functions of dispersants) and varnish (detergents). It also neutralizes acids that originate from fuel and from oxidation of the lubricant (detergents), improves the sealing of piston rings, and cools the engine by carrying heat away from moving parts. In some small engines such as lawn mower engines, dippers on the bottoms of connecting rods dip into the oil Motor oil, engine oil, or engine lubricant is any one of various substances used for the lubrication of internal combustion engines
