Sound film Reliable synchronization was difficult to achieve with the early sound-on-disc systems, and amplification and recording quality were also inadequate. Innovations in sound-on-film led to the first commercial screening of short motion pictures using the technology, which took place in 1923. journal of the University of Illinois at Urbana-Champaign's Electrical and Computer Engineering Department, says the audience was "members of the Urbana A sound film is a motion picture with synchronized sound, or sound technologically coupled to image, as opposed to a silent film. Before sound-on-film technology became viable, soundtracks for films were

commonly played live with organs or pianos. The first known public exhibition of projected sound films took place in Paris in 1900, but decades passed before sound motion pictures became commercially practical 3f6d56ab3a
