To... 3bc2b9ad5f I'm nominating this article for featured article because I feel it is ready. It meets most criteria, and it is very possible that this could be a big benefit to NYSR. The article went through a PR, without much results. However, I feel with more editors around, that FAC may prove to give more results than PR did. Create a command file, for example ListCheckWiki547.txt with the following contents: 3bc2b9ad5f A cellular automaton consists of a regular grid of cells, each in one of a finite number of states, such as on and off (in contrast to a coupled map lattice). The grid can be in any finite number of dimensions. For each cell, a set of cells called its neighborhood is defined relative to the specified cell. An initial state (time $t = 0$) is selected by assigning a state for each cell. A... 3bc2b9ad5f
