The effects of homework are debated. Generally speaking, homework does not improve academic performance among young children. Homework may improve academic skills among older students, especially lower-achieving students. However, homework also creates stress for students and parents, and reduces the amount of time that students can spend in other activities.

Homework Common homework assignments may include required reading, a writing or typing project, math problems to be completed, information to be reviewed before a test, or other skills to be practiced. 4 hours a week on homework. the OECD showed that Spanish children spend 6. This prompted the CEAPA, representing 12,000 Spanish parent associations, to Homework is a set of tasks assigned to students by their teachers to be completed at home
