One of the College Board's more recent additions, the AP Statistics exam was first administered in May 1996 to supplement the AP program's math offerings, which had previously consisted of only AP Calculus AB and BC. In the United States, enrollment in AP Statistics classes has increased at a higher rate than in any other AP class. Whereas special education is designed specifically for students with special needs, remedial education can be designed for any students, with or without special needs; the defining trait is simply that they have reached a point of lack of preparedness, regardless of why. For example, even people of high intelligence can be under-prepared if their education was disrupted, for example, by internal displacement during civil disorder or a war.

Secondary education in the United States It reaches the climax with twelfth grade (age 17-18). High school math courses typically include Pre-algebra, Algebra I, Geometry, Algebra II with trigonometry classes. Whether it begins with sixth grade (age 11-12) or seventh grade (age 12-13) varies by state and sometimes by school district. Advanced study options can Secondary education is the last six or seven years of statutory formal education in the United States

Remedial education courses for low-skill students might include: 1) pre-collegiate math, 2) basic algebra, and 3) intermediate algebra. There are many questions about how this Remedial education (also known as developmental
