Google Data Liberation Front The Google Data Liberation Front is an engineering team at Google whose "goal is to make it easier for users to move their data in and out of Google products. " The team, which consults with other engineering teams within Google on how to "liberate" Google products, currently supports 57 products. The purpose of the Data Liberation Front is to ensure that data can be migrated from Google once an individual or company stops using their services or the service is discontinued by Google

Audio engineer Recording engineer video interviews A free collection of online audio tools for audio engineers Audio Engineering online course Archived 2008-11-21 at An audio engineer (also known as a sound engineer or recording engineer) helps to produce a recording or a live performance, balancing and adjusting sound sources using equalization, dynamics processing and audio effects, mixing, reproduction, and reinforcement of sound. The physical recording of any project is done by an engineer...". Audio engineers work on the "technical aspect of recording—the placing of microphones, pre-amp knobs, the setting of levels

Freeware by third parties, and reverse engineering are permitted by some publishers but prohibited by others. Unlike with free and open-source software, which Freeware is software, often proprietary, that is distributed at no monetary cost to the end user. For instance, modification, redistribution by third parties, and reverse engineering are permitted by some publishers but prohibited by others. There is no agreed-upon set of rights, license, or EULA that defines freeware unambiguously; every publisher defines its own rules for the freeware it offers. Freeware may be intended to benefit its producer by, for example, encouraging sales of a more capable version, as in the freemium and shareware business models. Unlike with free and open-source software, which are also often distributed free of charge, the source code for freeware is typically not made available

Instrumentation The term has its origins in the art and science of scientific instrument-making. It is also a field of study about the art and science about making measurement instruments, involving the related areas of metrology, automation, and control theory. 1023/A:1023691917565. S2CID 102255170. Wikimedia Commons has media related to Instrumentation. Instrumentation is a collective term for measuring instruments, used for indicating, measuring, and recording physical quantities. Look up instrumentation in Wiktionary, the free dictionary

Instrumentation can refer to devices as simple as direct-reading thermometers, or as complex as multi-sensor components of industrial control systems. Instruments can be found in laboratories, refineries, factories and vehicles, as well as in everyday household use (e.g., smoke detectors and thermostats). 96c284afe5

Beam (structure) In engineering, beams are of several types: Simply supported – a beam supported on the ends which are free to rotate and have no moment A beam is a structural element that primarily resists loads applied laterally across the beam's axis (an element designed to carry a load pushing parallel to its axis would be a strut or column). Beams are characterized by their manner of support, profile (shape of cross-section), equilibrium conditions, length, and material. Its mode of deflection is primarily by bending, as loads produce reaction forces at the beam's support points and internal bending moments, shear, stresses, strains, and deflections. may rest on beams 96c284afe5

Sound engineering is increasingly viewed as a creative profession and art form, where musical instruments and technology are used to produce sound for film, radio, television, music and video games. Audio engineers also set up, sound check, and do live sound mixing using a mixing console and a sound reinforcement system for music concerts... 96c284afe5

List of free and open-source software packages FreeCAD – Parametric 3D CAD modeler with a focus on mechanical engineering, BIM, and product design. However, nearly all software meeting the Free Software Definition also meets the Open Source Definition and vice versa. For more information about the philosophical background for open-source software, see free software movement and Open Source Initiative. A small fraction of the software that meets either definition is listed here. Some of the open-source applications are also the basis of commercial products, shown in the List of commercial open-source applications. LibreCAD – 2D This is a list of free and open-source software (FOSS) packages, computer software licensed under free software licenses and open-source licenses. Software that fits the Free Software Definition may be more appropriately called free software; the GNU project in particular objects to their works being referred to as open-source. modeling computer-aided design (CAD) system 96c284afe5
